THE TIE CENTER

Technology, Innovation, Entrepreneurship

The TIE Center is the newest asset for business growth coming to the Southern Indiana region. TIE stands for Technology, Innovation, and Entrepreneurship. The TIE Center will have incubator space for entrepreneurs wanting to bring a new product into the market, training areas and equipment to provide advanced manufacturing and green energy training, trainers and labs to certify workers for A+ (COMP TIA), an accelerator area for those businesses that are ready to begin manufacturing, and all of the support services these activities will require. In addition, a 120 seat Presentation Hall will be built that will allow for international communication. Students wanting to learn the Russian language could have an instructor who lives in Moscow. The facility will have the technology and software built-in to allow simultaneous translation. This could save a business expensive flights overseas as well. Utilizing the Presentation Hall will allow a business to conduct presentations and meetings without a language barrier.

REGIONAL DEVELOPMENT

The world seems to be a smaller place today than in the past. This is evident by the ease in which traditional jobs have shifted to overseas markets. For example, if you

call for technical support, chances are your call will be routed overseas to India. There are higher technology jobs available in the US but most of them are concentrated on the east and west coasts.

This encourages our best and brightest to relocate to areas far away and hinders our opportunities. The TIE Center will provide resources necessary for businesses to grow at home.

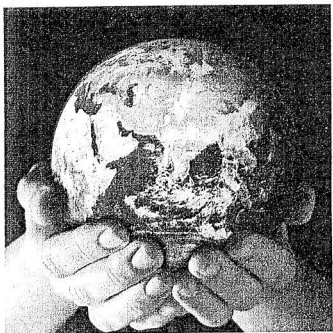

A company does not have to be a tenant at the TIE Center to take advantage of the services provided. An entrepreneur who would not benefit from the technology provided by the center will still benefit from the business advisor on staff and the training offered. Surrounding counties and towns can take advantage of the assets housed in the TIE center to develop their own workforce.

OUR MISSION:

Be the catalyst to create and enhance jobs for the needs of tomorrow.

OUR VISION:

Be an international, interactive resource center working to create, attract and retain well paying jobs, to enhance learning at all education levels, and to contribute to the vitality and competitiveness of our region.

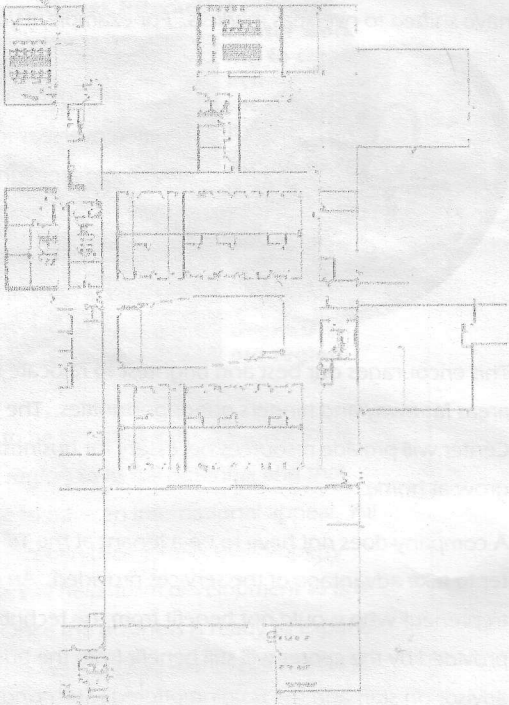

We want to be international. We want to develop our region to its full potential and that requires us to have an international appeal. All tenants will retain their intellectual property rights. We will help from development to production. Once the business is ready to expand we will work with LEDO's within our region to help them locate. We are actively looking for partners. What can we do to help you? Please contact us with your thoughts and ideas. If you
